Bylur

A person in a dark coat is walking away from the viewer across a vast, snow-covered landscape at night. The person is holding a small, glowing lantern in their right hand. The background is a dark, hazy night sky with a faint, large, circular light source, possibly the moon, visible in the upper left. The overall mood is quiet and contemplative.

MIDNIGHT MOON

Little do I know, of this world we live in.
I have come to terms with, to let things flow, around us.

We step outside, go for a walk, across the highlands.
Here is tranquility, emotional transparency surrounds us,
take my hand, and we will:

Stand side by side within this forest life,
rise above united, towards the midnight moon.
Harmonised heartbeat.

Luminous refraction of light: it shimmers.
Reflects endlessly on top of the river:
conduct our senses,
Take my hand, and we will:

Stand side by side within this forest life,
rise above united, towards the midnight moon.
Harmonised heartbeat.
